

Aharnish Parekar

+91 8767141256 — aharnishparekar7@gmail.com

Summary

Aspiring AI/ML Engineer with strong full-stack and data analysis experience, focused on building intelligent, data-driven systems. Skilled in integrating machine learning models into real-world applications and deriving insights from structured data.

Technical Skills

- **Languages:** Python, JavaScript, SQL
- **Frontend:** HTML, CSS, React, Flutter
- **Backend:** Node.js, Express.js
- **Machine Learning:** Scikit-learn, Logistic Regression, Model Training
- **Data Analysis:** Pandas, NumPy, EDA, Data Cleaning, Feature Engineering
- **Data Visualization:** Matplotlib, Seaborn, Power BI
- **Databases:** MongoDB, SQL
- **Tools & Platforms:** Git, n8n, APIs, Twilio, Render, Netlify, Jupyter Notebook, Google Colab

Projects

AI Customer Support Agent (WhatsApp Integration using Groq)

- Designed a tool-augmented AI agent using Twilio and n8n to handle real-time WhatsApp queries.
- Integrated Groq-based LLM with structured workflows for order tracking, inventory lookup, and ticket creation.
- Implemented intent-based routing and automated workflows to improve response accuracy and efficiency.

RentWear with AI Recommendations (ML + Full Stack)

- Developed a full-stack clothing rental platform with authentication, booking, and availability tracking.
- Built and integrated a Logistic Regression model for outfit recommendations based on user inputs.
- Performed data preprocessing and enabled real-time ML-driven recommendations within the application.

EazyFood - Full Stack Food Ordering Web Application

- Developed a full-stack food ordering system with cart, order management, and admin panel.
- Built RESTful APIs using Node.js and Express.js and deployed using cloud platforms.
- Designed admin features for managing menu items and orders.

Education

B.E. Computer Engineering	2022–2026
Anantrao Pawar College of Engineering, Pune	CGPA: 8.20
Class 12	2022
Wani Public School	70.33%
Class 10	2020
Lions English Medium School	92.20%

Certifications

- Python Programming: Internshala
- Web Development: Codehelp

Achievements

- Published paper on Fake Review Detection
- Published paper on AR Furniture Placement App
- Smart India Hackathon (SIH) internal round finalist
