

SAPTRAJ INDUSTRIES LLP

SAPTRAJ INDUSTRIES LLP

Accuracy the smart choice

COMPANY PROFILE

About SAPTRAJ INDUSTRIES LLP.

Founded in 2019, SAPTRAJ INDUSTRIES LLP is an ISO 9001-2015 certified Company. We offer precision and productive laser cutting resources that deliver high quality products. We are committed to providing customer service and solutions in the field of fully integrated be spoke metal work and precision sheet metal fabrication.

Our highly skilled workforces experience in metal fabrication. With on-site facilities for MIG welding in both CNC Fabrication shop, we are able to offer a comprehensive service to all our customers.

Working with industries as diverse as automotive, Textile, power plant, earth moving, telecommunications, Railways, Agricultural and general engineering has given us unrivalled experience in producing product to the very highest standard. When we promise a delivery we deliver on time, sourcing our products and materials carefully enabling competitive pricing whilst sharing the benefit with our customers.

Continuous improvement of technologies, systems and processes is central to achieving our business objectives. The training and development of our employees drives our competitiveness against other Indian and Asian providers. Become Grade “A” Fabricator is the goal set and achieved and customer satisfaction is never taken for granted but utilized as the standard for our service.

Certificate of Registration

This is to Certify That The Quality Management System of

M/S SAPTRAJ INDUSTRIES LLP

GATE NO.262, NANEKARWADI, OPP GANDHARV HOTEL, ALANDI PHATA,
CHAKAN, TAL. - KHED, DIST. PUNE - 410501, MAHARASHTRA, INDIA.

has been assessed and found to conform to the requirements of

ISO 9001:2015

for the following scope :

MANUFACTURE & SUPPLY OF AGRICULTURE, DAIRY EQUIPMENTS,
ELECTRICAL PANEL, CNC LASER CUTTING, BENDING & FABRICATION SHEET
METAL COMPONENTS.

Certificate No 23DQLV53
Initial Registration Date : 09/08/2023
Date of Expiry* : 08/08/2026
1st Surve. Due : 09/07/2024

Issuance Date : 09/08/2023
2nd Surve. Due : 09/07/2025

Quality

Quality assurance and Commitment of work is evident in everything we fabricate, test and deliver.

Our Quality technicians have objectives to achieve ongoing sustainable quality management principles. Commitment to quality with innovative technology and complete manufacturing solutions drives business and provide our customers with advantages in global market place.

Quality management is a process that starts with the specifications and materials required for an individual Application then focuses throughout each manufacturing step on delivering products quality that exceeds customer's expectations.

Quality Checking Instruments :-

Vernier Caliper
Height Gauge
Measuring Tape
Micrometer
Bevel Protector
Filler Gauge
Weld Gauge
Surface Table

We have state of the art manufacturing facility with qualified experienced staff having totaled more than 15+ year experience in similar field. Total shed 20000 sq ft area, Working area -10000 sq ft/office area -1500 sq ft, other 8500 sq ft. Open for garden area. Our Mfg. plant capacity 300 mt in monthly.

Main Entrance

Shop floor Sheet Metal Laser Cutting

We have new brand **laser machine of Bodor Make Fiber Laser**. It can laser clip Sheet metal of changing thicknesses and sizes. Our skillful team of programmers and operators at each manufacturing location are geared taking place for realization of obscure component laser bitter. With input as a drawings or a finished sample part provided by customer. We manage to pay for excellent prickly vibes and high precious laser rangy jobs. We have 3-Axis CNC Laser cutting of bodor.

A broad range of machinery allows us to economically fabricate unexpected prototypes for you to exam prior to series production and well happily acknowledge you to press to the lead and press on your products.

Specialist of CNC Laser Cutting In Metals

- ✚ Mild Steel 16 mm thickness
- ✚ Stainless Steel 6 mm thickness
- ✚ Aluminum 6 mm thickness

SAPTRAJ INDUSTRIES LLP

† Brass 5 mm thickness

† Copper 3 mm thickness

CNC Bending

Computer Numerical Control (CNC) bending machines guarantee a high level of productivity and repeatability. These machines fabricate that can be used for various classified applications employed in the automotive, chemical, and furniture industries, as ably as for ship building, railways, and new same industries. It is a highly automated and efficient in terms of precise bending. It allows high dimensional accuracy and design flexibility.

Our Expert team of CNC Laser cutting operators and program always take care of quality and material, we use up to date software's with easy programming, direct angle mode, new Bend deduction calculation, and note functions. Our CNC bending machine has wider functions in terms of height tool, supporter, etc. It also stimulates the bending process detecting collusion. This results in lower wastage, in turn economic manufacturing at faster speed resulting in quick deliveries.

Our manufacturing plants have capacity of room 200 Tons and Ram length of 3 meter. We can offer Bending up to 8 mm thickness for sheet steel. The knowledge and experience of bending operators that helps guarantee part accuracy and efficiency, knowing this well we provide the training necessary to give that expertise to the operators in the first place and time to time we organize training sessions within workshop to update the operators about new techniques and tools to improve productivity.

Also newly add 6mtr CNC bending Machine, 400 Tons, We can offer Bending up 8 mm full length 6 mtr & 12 mm 3 mtr.

Fabrication:-

Sheet metal fabrication

Sheet Metal Fabrication refers to the bending and shaping processes of sheet metal techniques. It can be sealed all sorts of obscure hollow shapes and sections, and the equipment used for these processes, range from easy hand tools, to higher gift-operated automatic machinery.

Welding:-

We have wide range of welding equipment's of reputed brands like ADOR and Mogra Make 15 nos machine . Highly skilled team has the capability to translate your design into precision finished items.

We apply abroad range of high-tech and conventional fabrication skills to the cost- effective manufacture of many products.

SAPTRAJ INDUSTRIES LLP

Complex structures are assembled and produced in our fabrication department and we are able to supply complete bolted or welded assemblies.

MIG Welding:

Gas Metal Arc Welding (GMAW) is frequently referred to as MIG welding. MIG welding is a commonly used high deposition rate welding process. Wire is continuously fed from a spool. MIG welding is therefore referred to as a semiautomatic welding process.

MIG Welding Benefits:

- All position capability
- Higher deposition rates than SMAW
- Less operator skill required
- Long welds can be made without starts and stops
- Minimal post weld cleaning is required
- Low distortion

Arc Welding:

The rarefied reveal for arc welding is SMAW or MMAW. This is Shielded or Manual Metal Arc Welding. This period you use an electrode which is just a length of filler wire that is going on the subject off or average approximately 1 ft long and is covered in a flux. As you use the rod happening the flux will burn off and create a shield in gas that protects the weld.

Arc Welding is frequently referred to as stick or covered electrode welding. arc welding is among the most widely used welding processes.
